Statement of Nature, Reasons and Basis for Filing

Background

The Transporter's Use (%)s for ANR's transportation and storage services are comprised of: (i) a current fuel use percentage reflecting ANR's gas usage in the previous calendar year; and (ii) an annual volumetric adjustment reflecting the true-up of over- and under-collections of gas during the previous calendar year.

The EPC Charge for ANR's transportation services is comprised of: (i) a current electric power charge reflecting electric power costs incurred by ANR at its Weyauwega compressor station in Waupaca County, Wisconsin, during the previous calendar year; and (ii) an annual electric power cost adjustment reflecting the true-up of over- and under-collections of electric power costs for the previous calendar year and inclusive of carrying charges on the monthly net over- and under-collection activity.

The EPC Charge for ANR's storage services is comprised of: (i) a current electric power charge reflecting electric power costs incurred by ANR at its Cold Springs 1 Storage facility located in Kalkaska County, Michigan, during the previous calendar year; and (ii) an annual electric power cost adjustment reflecting the true-up of over- and under-collections of electric power costs for the previous calendar year and inclusive of carrying charges on the monthly net over- and under-collection activity.

In accordance with Section 6.1.86 of the GT&C of ANR's Tariff, the method used to calculate the Transporter's Use (%)s and the EPC Charges is the "modified transactional throughput" methodology.[4]

Instant Filing

To comply with the annual fuel and electric power cost redetermination provisions of Section 6.1.86 and Section 6.34 of its Tariff, ANR herein provides revisions to its general system Transporter's Use (%)s and EPC Charges for its transportation and storage services.

As reflected in the workpapers attached hereto as Appendix B, ANR is proposing an increase in its Transporter's Use (%) for storage services[5] from 0.57% to 0.76% and an increase in Transporter's Use (%) for lost and unaccounted for gas from 0.06% to 0.20%. For transportation service, the summary workpapers included herein as Appendix B reflect increases to Transporter's Use (%)s for almost all of the various transportation zones and paths on ANR's system. ANR's application of the Commission-approved surcharges and true-up during calendar year 2021, to implement refunds for a prior period,[6] combined to artificially reduce the Transporter's Use (%)s in all zones, particularly in the SW Area and along the SW Leg.[7] The removal of both of these mechanisms at the end of calendar year 2021, in compliance with the Commission's orders,[8] resulted in an increase in the Transporter's Use (%) for the SW Area and SW Leg, and contributed

[4] Under this methodology, the fuel *retained* from (or assessed to) shippers during the previous calendar year is used to derive the "transactional throughput." The new Transporter's Use (%)s and EPC Charges are then calculated by dividing the actual fuel *used* by the sum of (1) the "transactional throughput" and (2) the actual fuel *used*.

[5] In addition to ANR Storage Company and Blue Lake Gas Storage Company ("Blue Lake"), ANR reimbursed storage fuel to Pine Prairie Energy Center ("Pine Prairie") during calendar year 2022. Pine Prairie supplements the operational balancing function provided by ANR Storage Company and Blue Lake for the Southeast portion of ANR's system. Due to its direct connection near the Southeast Head Station, Pine Prairie storage allows ANR to better manage imbalances, linepack, load swings and outage impacts on the Southeast Mainline and in the Southeast Area.

[7] See Appendix B, Attachment 1, page 7 of 15, in *ANR Pipeline Company*, Annual Redetermination of Transporter's Use and EPC Charges Filing, Docket No. RP22-588-000 (February 24, 2022).

to the increase to the rate proposed herein for Transporter's Use (%) for lost and unaccounted for across ANR's system.

Further, ANR ended calendar year 2022 in a total under-recovered position of 2.044 Bcf, including a total transportation under-recovery of 2.019 Bcf and a storage under-recovery of 0.025 Bcf.[9] This is in contrast to ANR's 2022 annual fuel filing where ANR ended calendar year 2021 in a total over-recovered position of 1.858 Bcf, including a total transportation over-recovery of 1.634 Bcf and a storage over-recovery of 0.224 Bcf.[10] This reversal in the true-up component results in the application of an upward Annual Transporter's Use Adjustment (%).[11]

ANR is proposing an increase to the incremental Transporter's Use (%) for the Grand Chenier Xpress Project ("GCXP") from 0.57% to 1.17%. The increase results from the application of an upward Annual Transporter's Use Adjustment (%) due to ANR ending calendar year 2022 in an under-recovered position,[12] and the increase in Transporter's Use (%) for lost and unaccounted for gas. Additionally, this increase in Transporter's Use (%) for lost and unaccounted for gas resulted in a corresponding increase in the Incremental Transporter's Use (%) for the Alberta Xpress Project.[13]

Workpapers Included

In compliance with Section 154.201(b) of the Commission's regulations, summary level workpapers supporting ANR's redetermination of (i) its Transporter's Use (%) matrix, (ii) the EPC

[12] See Appendix B, Attachment 5, page 3 of 3.

[13] In its application pursuant to sections 7(b) and 7(c) of the Natural Gas Act, ANR proposed, and the Commission accepted, charging: (i) its existing system rates for project service from ANR's Northern Segment to its Southeast Area and (ii) an incremental Transporters' Use (%) of company-use gas quantities for project service from ANR's Northern Segment to its Southeast Southern Segment for the Alberta Xpress Project ("AXP Project"), which included a Lost and Unaccounted For factor to be redetermined annually by ANR. See *ANR Pipeline Company*, 179 FERC ¶ 61,040 (2022). The AXP Project rates included the then current Lost and Unaccounted For factor of 0.06%. As part of the instant filing, ANR proposes adjusted rates for the AXP Project based on the increased lost and unaccounted for gas rate of 0.20% proposed herein. Additionally, the fuel component of the AXP Project's Transporter's Use (%) for Zones 7, 3, and 1 increased in conjunction with the increase to the base system rates. However, the fuel component of the AXP Project's Transporter's Use (%) for Zone 2 is an incremental rate, and thus, remains unchanged in this filing as the AXP Project was not in service during calendar year 2022.

Charge for transportation matrix, (iii) the EPC Charge for storage services, and (iv) the incremental Transporter's Use (%) for GCXP are provided in the instant filing (Appendix B, Attachments 1, 2, 3, and 5). To assist parties in comparing the data used in this filing with its Form No. 2 data, ANR is also submitting a reconciliation of the fuel and electric power cost data used in this filing with the data to be included in its upcoming Form No. 2 filing (Appendix B, Attachment 4). Finally, detailed workpapers providing monthly support for company use gas volumes, electric power costs incurred, and the volume of gas retained by ANR from its customers are also included herein (Appendices C-1 and C-2).

Effective Date

ANR respectfully requests that the Commission accept the proposed tariff sections, included as Appendix A-1, to become effective April 1, 2023.

1. There will be no charge for Transporter's EPC on services performed within any Hub, services under Rate Schedule IPLS, or services provided on the 12-mile lateral located between the Link Meter Station and the Corunna Interconnect Point in St. Clair, Michigan.

2. The areas and segments listed above are defined in Section 6.1 of the General Terms and Conditions of this Tariff, and are illustrated on the system map in Section 3.1.

3. In the case of any Shipper that purchases Gas from a Pooler, the provisions of Rate Schedules PTS-1, PTS-2 and PTS-3 shall be applicable.

SOUTHEAST AREA GATHERING SERVICE

1. AVAILABILITY

This Southeast Area gathering service is available to any person, corporation, partnership or any other party (hereinafter referred to as "Shipper"). Terms and conditions applicable to this service will be individually negotiated between Shipper and Transporter, on a not unduly discriminatory basis, consistent with the terms and conditions applicable to Transporter's Part 284 transportation.

2. FIRM SERVICE CHARGES

Each Month Shipper shall pay to Transporter a charge not to exceed the following:

(1) Reservation Charge:

$1.4947 for each Dekatherm of MDQ.

(2) Commodity Charge:

$0.000 for each Dekatherm of Gas Delivered Hereunder.

3. INTERRUPTIBLE SERVICE CHARGES

Each Month Shipper shall pay to Transporter a commodity charge not to exceed $0.0491 for each Dekatherm of Gas Delivered Hereunder.

4. FUEL AND L&U REIMBURSEMENT

Transporter shall retain ~~0.06~~0.20% of each Dekatherm of Gas tendered to Transporter at the Receipt Point(s) in the Southeast Area. This percentage is comprised of 0.00% fuel and ~~0.06~~0.20% L&U, provided, however, if Transporter also provides Transportation of such Gas, the retention % will not include L&U.

ANR Pipeline Company

Transactional Throughput Derived From Fuel Retention By Rate Route

Inputs:

- Actual Fuel Retained by Rate Route
- Transmission, Storage Injection and Gathering Fuel Retention Percentages as per ANR's FERC Gas tariff.

Transactional Throughput Derived from Retention by Rate Route Calculations:

- Transactional Throughput Derived from Retention by Rate Route as Follows:

Non Gathered Quantities

$$\text{Transactional Throughput} = \left(\frac{\text{Fuel Retained}}{\text{Transmission Fuel Rate}}\right) - \text{Fuel Retained}$$

Gathered Quantities

$$\text{Transactional Throughput} = \left(\frac{\text{Fuel Retained}}{\text{[Transmission Fuel Rate+0.95*Gathering Fuel Rate]}}\right) - \text{Fuel Retained}$$

- Area and Segment Transactional Throughput for Fuel Retention Calculation:

Area Transactional Throughput for Fuel Retention =
Sum of all Transactional Throughputs for Fuel Retention through Area
- Sum of all Backhauls for which a Fuel Retention credit is Accrued

- Conversion of Area and Segment Transactional Throughput from Dth to Bcf for use in Fuel Matrix Calculations using ANR's Dth per Mcf conversion factor.

Fuel Matrix Determination Calculation:

$$\text{Required Fuel Percentage} = \left\{1 - \left[\frac{\text{(Transactional Throughput)}}{\text{(Fuel Used + Transactional Throughput)}}\right]\right\} =$$

$$\frac{\text{Fuel Used}}{\text{Fuel Used + Transactional Throughput}}$$

APPENDIX C-1

Detail of Company Use Gas and Electric Power Costs

Appendix C-1 includes the following:

Tab 1 - Monthly reports for calendar year 2022 showing actual gas use consumption. The Company Use of Gas ("CUG") reports show actual metered volumes used on ANR's pipeline system.

Tab 2 - Summary of Tab 1 monthly CUG reports. The total volumes reported are reconcilable to the compressor fuel volumes that will be reported in ANR's FERC Form No. 2. The reports identify the other components of Transporter's Use gas as cross-referenced by FERC account number, identify, for 2022, the annual volume of Account No. 858 fuel paid to others and storage fuel paid to others, and ANR's Lost and Unaccounted for ("L&U") volumes. The reports summarize the total Transporter's Use volumes for 2021, which are consistent with the total Transporter's Use volumes that ANR has reflected in this fuel matrix re-determination filing.

Tab 3 – Company Use 2021 Prior Period Adjustments Within 2022.

Tab 4 - Monthly 2022 invoices showing actual electric power costs incurred at ANR's Weyauwega Compressor Station in Waupaca County, Wisconsin, which are consistent with the total Electric Power Cost by Segment that ANR has reflected in the fuel matrix for the Transportation EPC Charge in this filing. These costs are reconcilable to the costs that will be reported in ANR's FERC Form No. 2.

Tab 5 – Monthly 2022 invoices showing actual electric power costs incurred at ANR's Cold Springs 1 Compressor Station in Kalkaska County, Michigan, which are consistent with the total Electric Power Cost that ANR has reflected in the Storage EPC charge in this filing. These costs are reconcilable to the costs that will be reported in ANR's FERC Form No. 2.

This check is the capital credit refund you earned as a Great Lakes Energy electric cooperative member during any or all of the following years: 2020 and 2000.

Great Lakes Energy members are entitled to a share of the margins earned by this member-owned business. Our board of directors approved a $5.2 million capital credit retirement this year which includes $2 million in margins for 2020 and the remainder of margins from 2000.

We plan to continue to issue capital credit refunds each year provided financial conditions allow.

That's the cooperative difference.

Claim for Refund: September 5, 2017 through August 13, 2021
Amount: $182,853.24

This is in response to your filing of form 5633 (Purchaser Refund Request for a Sales or Use Tax Exemption) concerning a refund of tax paid on purchases from Great Lakes Energy.
