

ANR Pipeline Company

Director, Marketing. This position is responsible for overseeing the long-term and short-term marketing activity of ANRPL capacity and developing and maintaining customer relations. This position is a Transmission Function Employee.

Marketing Representative/Account Coordinator. This position is responsible for marketing ANRPL capacity and developing overall customer relationships that optimize firm transmission and storage capacity sales on a short-term and long-term basis. This position is a Transmission Function Employee.

Director, Rates, Tariffs and Modernization. This position is responsible for overseeing the department which maintains ANRPL's FERC gas tariffs, submits and administers ANRPL's rate filings, submits related compliance filings to the FERC and ensures that Modernization filings are administered in compliance with FERC policy and agreed upon mechanisms. This position is a Transmission Function Employee.

Manager, Rates. This position is responsible for managing preparation of and supporting ANRPL's rate cases, general rate analyses related to ANRPL's financial plans and capital projects, and related compliance matters. This position is a Transmission Function Employee.

Regulatory Analyst, Rates. This position is responsible for the preparation and support of ANRPL rate cases and related materials, in addition to general rate analyses associated with ANRPL and ANRPL's financial plans and capital projects. This position is a Transmission Function Employee.

Manager, Tariffs. This position is responsible for maintaining ANRPL's FERC gas tariff and submitting related compliance filings to the FERC. This position is a Transmission Function Employee.

Regulatory Analyst, Tariffs. This position is responsible for the preparation of ANRPL's tariff materials and related compliance matters. This position is a Transmission Function Employee.

Manager, Asset Modernization. This position is responsible for maintaining any approved Modernization programs for ANRPL assets in compliance with FERC regulatory requirements. This position is a Transmission Function Employee.

Regulatory Analyst, Modernization. This position is responsible for preparation of Modernization materials and related compliance matters associated with Modernization programs. This position is a Transmission Function Employee.

Grad Rotational Program. This position has duties that overlap both analyst groups noted above. This position is a Transmission Function Employee.

Director, Nominations & Scheduling. Responsible for directing operations and activities of the Nominations and Scheduling Department in relation to customer support, nominations, confirmations, pipeline scheduling, pipeline maintenance, imbalance management, application support and maintenance. This position is a Transmission Function Employee.

Manager, Nominations & Scheduling. Responsible for overseeing and coordinating daily operations for pipeline scheduling, interconnect confirmation process, imbalance management and providing after hours' customer support. This position is a Transmission Function Employee.

Nominations & Scheduling Representatives. Responsible for daily scheduling of pipeline including interconnect confirmation and after hours' customer support. This position is a Transmission Function Employee.

Customer Service Representatives. Responsible for providing customer support during business hours on activities related to nominations, confirmations, pipeline scheduling, pipeline maintenance and imbalance management. This position is a Transmission Function Employee.

Manager, Commercial Services. Responsible for overseeing and coordinating maintenance, development and reporting of transportation systems, user application production support and technical customer support. This position is a Transmission Function Employee.

Business Analysts, Commercial Services. Responsible for the maintenance, development and reporting of the transportation systems, application security, user application production support and technical customer support. This position is a Transmission Function Employee.

Director, Transportation Accounting & Contracts. This position oversees the departmental responsibilities for contracting, capacity releases, credit, application security, customer invoicing, cash receipts, accounts receivable management, customer support, revenue accounting, gas accounting, and application support. This position is a Transmission Function Employee.

Manager, Contracts. This position is responsible for managing the day-to-day functions relating to contracts, capacity releases, credit, customer support, application security and application support. This position is a Transmission Function Employee.

Contracts Analyst. This position is responsible for customer support, contracts, capacity releases, application security and application support. This position is a Transmission Function Employee.

Credit Analyst. This position is responsible for customer support, credit, application security and application support. This position is a Transmission Function Employee.

Manager, Transportation Accounting. This position is responsible for managing the day-to-day functions of customer invoicing, cash receipts, accounts receivable management, customer support, revenue accounting, gas accounting and application support. This position is a Transmission Function Employee.

Revenue and Gas Accountant. This position is responsible for customer invoicing, customer support, revenue accounting, gas accounting and application support. This position is a Transmission Function Employee.

Cash, A/R and Gas Accountant. This position is responsible for recording cash receipts, accounts receivable management, customer support and gas accounting. This position is a Transmission Function Employee.

Director, Gas Control & Planning. This position is responsible for providing daily operation services activities including gas control, facility and operations planning. This position is a Transmission Function Employee.

Manager, Gas Control. This position is responsible for the day-to-day activities of gas control, including dispatch of all pipeline flows, pipeline inventory, daily capacity, delivering/receiving scheduled gas flows, monitoring all interconnect points and meter stations for alarms and shut downs. This position is also responsible for managing the gas control response to planned and unplanned outages/events for safe effective and efficient operation of the pipeline. This position is a Transmission Function Employee.

Supervisor, Gas Control. This position is responsible for implementing programs, policies and procedures within the control room. This position is the primary contact and planner of gas control procedures, pipeline operational issues, emergency preparedness and general inquiries. This position is a Transmission Function Employee.

Gas Controller. This position is responsible for providing 24x7 safe, effective, and efficient remote operation, monitoring and control of pipelines to ensure the required gas volumes, linepack, quality, and contract pressures are achieved on a daily basis in conjunction with operations planning and field operations. This position also monitors system hydraulics and provides recommendations as required, as well as responding to and documenting unscheduled outages, alarm, and event handling. This position is a Transmission Function Employee.

Manager, Operations Planning. This position is responsible for planning and directing day-to-day system operational analysis, the scheduling and coordination of facility outages, and the development of system operating strategies. This position is a Transmission Function Employee.

Engineer, Operations Planning. This position is responsible for day-to-day system operational analysis, scheduling and long-term planning and coordinating of facility outages and development of system operating strategies. This position is a Transmission Function Employee.

Business Analyst, Operations Planning. This position is responsible for operational analysis, internal reports and outage postings. This position is a Transmission Function Employee.

Manager, Facility Planning. This position is responsible for planning, directing and reviewing facility designs of the pipeline system. This position is a Transmission Function Employee.

Engineer, Facility Planning. This position is responsible for maintaining firm contracts and capacities. This position is a Transmission Function Employee.

Business Analyst, Facility Planning. This position is responsible for the firm capacity management process, internal reports and regulatory reports. This position is a Transmission Function Employee.

Manager, System Planning. This position is responsible for planning and designing incremental pipeline designs for the pipeline system. This position is a Transmission Function Employee.

Engineer, System Planning. This position is responsible for designing incremental pipeline designs for the pipeline system. This position is a Transmission Function Employee.

Manager, Control Room Support. This position is responsible for the control room's Control Room Management (CRM) program and ensuring it is developed, maintained and delivered in compliance with CFR 192.631. This position also has responsibility for certain Emergency Management Planning tasks as well as certain technical tools used for compliance. This position is a Transmission Function Employee.

Engineer/Analyst, Control Room Support. This position is part of a team responsible for supporting the CRM program and the Gas Control Team in its compliance with CFR 192.631. This position is responsible for developing, maintaining, and delivering content for topics including but not limited to the following: Roles and Responsibilities, Adequate Information, Fatigue Mitigation, Alarm Management, Change Management and Training. This position is a Transmission Function Employee.

Analyst, Monitoring Center. This position is responsible for providing 24x7 communication support to the control room staff including controllers, field operations, first responders and associated leadership. This position ensures critical information is disseminated to the correct teams for reporting timelines and response to issues that occur on or near company assets. The Monitoring Center fields calls from emergency services as well as line marker calls to aid in prompt, accurate response to external parties. This position is a Transmission Function Employee.

Supervisor, Monitoring Center. This position is responsible for implementing programs, policies, and procedures within the Monitoring Center. This position is also responsible for the maintenance, development and evolution of the applications and processes used by the Monitoring Center to support the control rooms and communication between various stakeholder groups. This position is a Transmission Function Employee.

Manager, Operational Controls. This position is responsible for overseeing day-to-day system operational analysis, internal reports, and the coordination of capacity reservations. This position is a Transmission Function Employee.

Business Analyst, Operational Controls. This position is responsible for operational analysis, internal reports, and capacity reservations. This position is a Transmission Function Employee.

Director, Measurement. This position is responsible for overseeing the department which provides technical and non-technical support for design, operation and maintenance of measurement and regulation equipment and data. This position is a Transmission Function Employee.

Manager, Measurement Services, Measurement Engineering, Analytics and Specialists. This position is responsible for managing the technical and non-technical support for operations and maintenance of pipeline facilities with a concentration on measurement and regulation equipment and data. This position is a Transmission Function Employee.

Business Analyst, Gas Quality, Gas Measurement, LAUF. This position is responsible for the investigation and resolution of gas quality, gas measurement, and lost and unaccounted for gas issues. This position is a Transmission Function Employee.

Measurement & Regulation Technologist/Specialist. This position is responsible for providing technical and non-technical support related to the operations and maintenance of

gas measurement and regulation facilities. This position is a Transmission Function Employee.

Engineer, Measurement & Regulation, LAUF. This position is responsible for providing technical and non-technical support related to design, operations and maintenance of pipeline facilities with a concentration on measurement and regulation equipment. This position is a Transmission Function Employee

Director, Integrity. This position is responsible for oversight of the Integrity Management Programs, and specifically the management of integrity threats including compliance with federal regulations in support of Pipeline Integrity Engineers and Managers. This position is a Transmission Function Employee.

Engineer, Pipeline Integrity. This position is responsible for planning and assessing integrity maintenance activities, including inspections, remediations, and preventive actions. This position is a Transmission Function Employee.

Technologist / Specialist, Pipeline Integrity. This position is responsible for planning and assessing integrity maintenance activities, including inspections, remediations, and preventive actions. This position is a Transmission Function Employee.

Director, US Operations Technical Support. This position is responsible for overseeing the department which provides technical and non-technical support for design, operation and maintenance of compressor station equipment and data. This position is a Transmission Function Employee.

Manager, Compression, Fleet Management, Automation and Electrical. This position provides leadership for and management of technical and non-technical support for operations and maintenance of pipeline facilities with a concentration on compression equipment. This position is a Transmission Function Employee.

Engineer, Compression, Fleet Management, Automation and Electrical. This position is responsible for providing technical and non-technical support related to operations and maintenance of pipeline facilities with a concentration on compression equipment. This position is a Transmission Function Employee.

Technologist/Specialist, Compression, Fleet Management, Automation and Electrical. This position is responsible for providing technical and non-technical support related to operations and maintenance of pipeline facilities with a concentration on compression station equipment. This position is a Transmission Function Employee.

Director, US Gas Operations. This position is responsible for ensuring safe, reliable and sustainable operations and maintenance of the assets within the ANRPL footprint. This position is a Transmission Function Employee.

Manager, ANRPL Area & Safety. This position provides leadership for and management of technical and non-technical support of field positions in ANRPL Operating Area. This position is a Transmission Function Employee.

Pipeline Technician, Electronics, Instrumentation and Controls (EIC) and Corrosion Control. Responsible for providing technical and non-technical support related to operations and maintenance of ANRPL facilities with a concentration in control and measurement equipment and corrosion control equipment. This position is a Transmission Function Employee.

Manager, NAESB, Compliance & Reporting. Responsible for overseeing and coordinating interaction with the North American Energy Standards Board (NAESB), review and reporting of compliance related issues for the Commercial Operations area, and development and internal reporting of commercial data from the ANRPL transactional systems and data warehouse. This position is a Transmission Function Employee.

Business Analyst, Commercial Services. Responsible for the maintenance and development of internal commercial reporting on the ANRPL transactional systems and data warehouse, development and maintenance of Commercial Operations informational dashboards and the development and maintenance of the ANRPL Customer Relationship Management system. This position is a Transmission Function Employee.

Director, USNG Revenue and Commercial Analytics. This position is responsible for overseeing fundamental, analytical, and pricing support for the long-term and short-term ANRPL marketing teams. This position is a Transmission Function Employee.

Business Analyst, Pricing. This position is responsible for providing fundamental, analytical, and pricing support to the long-term and short-term ANRPL marketing teams. This position is a Transmission Function Employee.

Director, Gas Storage. This position provides leadership for and management of technical and non-technical support for operations and maintenance of storage facilities with a concentration on gas wells, reservoirs and surface gas processing trains. This position is a Transmission Function Employee.

Program Support Manager, Storage Technical Services. This position provides management support for Storage Technical Services capital and O&M programs, as well as gas storage subject matter expertise. This position is a Transmission Function Employee.

Engineer & Geologist, Storage Technical Services. These positions are responsible for providing technical and non-technical support related to design, operations, and maintenance of storage facilities including wells, reservoirs, and surface gas processing equipment. These positions are Transmission Function Employees.

Storage Technician, Storage Technical Services. Responsible for providing technical and non-technical support related to construction, operations, and maintenance of storage assets. This position is a Transmission Function Employee.

Director integrity data, mega rule and program planning. This role is responsible for ensuring compliance with regulatory requirements as they relate to class program, MAOP reconfirmation and mega rule in addition to program planning across technical and operational services. This position is a Transmission Function Employee.

Engineer, Pipeline Integrity. This position is responsible for MAOP reconfirmation, application of mega rule and analyzing structure and occupancy around ANRPL's ROW to confirm compliance. This position is a Transmission Function Employee.

Data Engineer. The position is responsible for helping manage pipeline data in support of analysis required for integrity engineering and reporting. This position is a Transmission Function Employee.

Manager, Emission Reduction. This role is responsible for managing the US emissions reduction program. This position is a Transmission Function Employee.

Manager, Project Authorizations. This position is responsible for overseeing the department which focuses on certificate matters and applicable analyses for ANRPL's pipeline and storage facilities under the jurisdiction of the FERC. This position is a Transmission Function Employee.

Manager, Certificates. This position provides leadership and additional management support to the Manager, Project Authorizations and focuses on certificate matters and applicable analyses for ANRPL's pipeline and storage facilities under the jurisdiction of the FERC. This position is a Transmission Function Employee.

Analyst, Project Authorization. This position focuses on certificate matters and applicable analyses for ANRPL's pipeline and storage facilities under the jurisdiction of the FERC. This position is a Transmission Function Employee.

Grad Rotational Program. This Position has duties that overlap with the Analyst, Nominations & Scheduling Representatives, and Business Analyst, Pricing. This position is a Transmission Function Employee.

Director, Asset Information, Operational Planning & Support. This position is responsible for overseeing the Maintenance Program & Planning Team, Business Intelligence / SAP Master Data Teams, Controlled Document Sustainability Team, Business Optimization Team and Integrity Operational Services (Geographic Information System (GIS) / One Call) and Right of Way Team. This position is a Transmission Function Employee.

Senior Manager, Maintenance Program & Planning (MPP). This position is responsible for managing and leading the work management process by governing how work on USGO assets is analyzed, identified, planned, scheduled, executed and completed as well as for all master data related to the SAP maintenance module. This position is a Transmission Function Employee.

Manager, Maintenance Program (MPM). This position is responsible for the long-range planning and scheduling of work in the operating regions of U.S. Gas Operations. This position is a Transmission Function Employee.

Manager, Project Maintenance Program (PMPM). This position is responsible for the effective planning and scheduling of work related to all US Gas Operation's projects through managing and leading the FWP's and their assigned duties. This position is a Transmission Function Employee.

Planner, Area Field Work (AFWP). This position is accountable for short-range planning in the operational areas within the regions of U.S. Gas Operations. The short-range plan encompasses all work and resources for a one-month period. This position is a Transmission Function Employee.

Planner, Project Field Work (PFWP). This position is responsible for maintaining planning details for U.S. Gas Operations Projects. The Project FWP obtains an approved

project list from the Project MPM, utilizing the project planning dashboards. This position is a Transmission Function Employee.

Analyst, Regional Master Data. This position is responsible for the upkeep of the master data around all equipment and maintenance within each region of responsibility. This position is a Transmission Function Employee.

Analyst, Project Master Data. This position is responsible for the updating of all master data associated with projects until six months after in-service. This position is a Transmission Function Employee.

Manager, Integrity & Operations Services. This position is responsible for overseeing the data collection and accuracy of the GIS database, the records and research department related to all IOS responsibilities and the US One Call centers that provide service to all USNG and USPL. This position is a Transmission Function Employee.

Specialist, One Call Centers. This position is responsible for interpreting and processing all (Normal, Short notice, Emergency) One-Call tickets by following through to ensure ticket closure and serves as the point-of-contact for all incoming requests to locate pipelines which are then assigned to the appropriate personnel. This position is a Transmission Function Employee.

Team Lead, US Geographic Information System (GIS) Services. This position is responsible for providing overall guidance and direction to USIOS GIS Technicians while acting as GIS Subject Matter Expert on integration activities and make recommendations with regards to the database and/or processes. This position is a Transmission Function Employee.

Technician, Geographic Information System (GIS). This position is reasonable for reviewing and routinely interpreting data sources and uses basic GIS software functions and workflows to enter, edit and update GIS spatial data. This position also follows established and detailed procedures to enter parameters and generate standard GIS products including maps, shape files, graphics, tables and reports to meet specific customer requirements. This position is a Transmission Function Employee.

Analyst, Geographic Information System (GIS). This position is responsible for assisting in the design, development, testing and implementation of GIS applications to meet customer needs and enterprise requirements. This position is a Transmission Function Employee.

Manager, Right of Way (ROW). This position is responsible for overseeing the ROW Maintenance Program which ensures compliance with operation and maintenance policies, practices, and procedures. This position is a Transmission Function Employee.

Project Manager, Right of Way (ROW). This position is responsible for serving as a focal point for ROW Maintenance projects within assigned areas of responsibility including project planning, execution, timing, quality, and cost. This position is a Transmission Function Employee.

Technologist, Right of Way (ROW). This position is responsible for Providing technical expertise and services in support of ROW Maintenance activities. This position is a Transmission Function Employee.

Manager, Business Optimization. This position oversees the complete Business Optimization portfolio of projects, initiatives, and advanced analytics team. This position is a Transmission Function Employee.
